

This is a *static text* element containing styled text. **Styled text** elements are introduced by setting the *isStyledText* boolean attribute available for the **textElement** tag to *true* and by formatting the text content using nested **style** tags and simple HTML tags.

This is a text field element that contains styled text displaying the text-only version of the ^Jasper**Reports** logo.

Here is the list with the attributes supported by the **style** tag used to format the text content inside a styled text element:

fontName

size

isBold

isItalic

isUnderline

~~isStrikeThrough~~

pdfFontName

pdfEncoding

isPdfEmbedded

forecolor

backcolor

Here is the list with the supported HTML tags :

bold

italic

underlined

an empty line follows(
):

A bulleted list:
